

DIGITAL TEACHING PROFESSIONAL FRAMEWORK

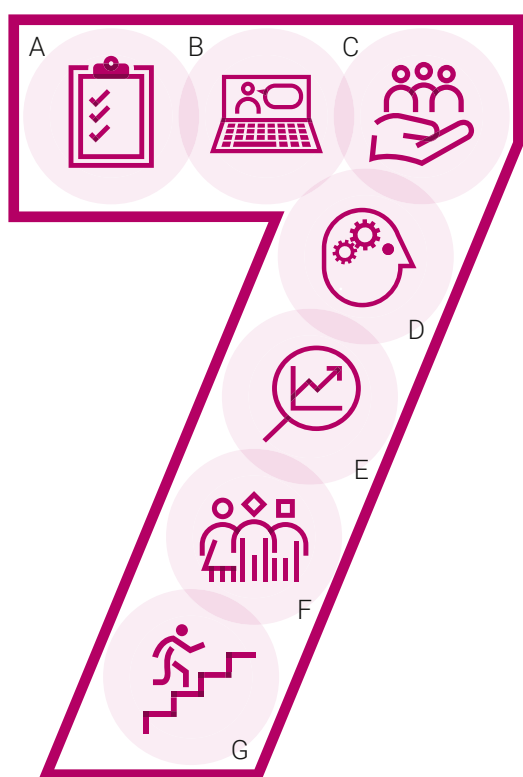

EDUCATION & TRAINING FOUNDATION

Taking learning to the next level

For teachers and trainers in the FE and Training sector

Digital skills are opening up new possibilities for learning and working, as well as leisure and well-being. Using digital technology has become a key way of helping teachers and trainers to improve their professional practice and enrich learners' experience, preparing them for the changing world of work.

The Digital Teaching Professional Framework provides a structure for practitioners in the FE and Training sector to understand how technology can be used to enhance teaching, as well as a pathway for development and career progression. It will be accompanied by free, online, bite-size training modules to support self-identified training needs.

ELEMENTS

COVERING DIFFERENT TEACHING CONTEXTS AND ACTIVITIES

- A. Planning your teaching
- B. Approaches to teaching
- C. Supporting learners to develop employability skills
- D. Subject-specific and industry-specific teaching
- E. Assessment
- F. Accessibility and inclusion
- G. Self development

3 STAGES

Practitioners will be able to use the accompanying training modules as free-standing resources and to work towards certified badges at three levels.

An individual practitioner may not necessarily be at the same stage for each of the different elements.

Stage 1 – Exploring

Stage 2 – Adopting

Stage 3 – Leading
