

Are you SET for Teaching Success?

Transfer your skills into a new career teaching in Further Education. Graduates, industry technical experts and veterans can apply for funded teacher training and a package of support.

Contact one of our hubs with any queries:

North - Blackburn College: Catherine Pearson – catherine.pearson@blackburn.ac.uk

Midlands and South - Skills and Education Group: Simon Feneley-Lamb – simonfl@skillsedugroup.co.uk

Teacher Training

Our teacher training is funded by the Department for Education and is available at no cost to the trainee or FE provider. The training can be done face-to-face, online or through a blend of the two.

Ongoing Support

Every trainee has a personal mentor offering subject specialist support and guidance to the world of Further Education teaching. You can also access additional training and networks to enhance your skills.

**USE YOUR TECHNICAL EXPERTISE TO
TEACH IN FURTHER EDUCATION**

NEXT APPLICATION DEADLINE: 31 MARCH 2021

SET for Teaching Success fully funded technical teacher training

Next application deadline: 31 March 2021

Dynamic training

Our training is flexible enabling you to train while you teach. You can receive: face-to-face training from the FE provider where you are teaching; fully online training from the University of Portsmouth (graded 'Outstanding' by Ofsted for its teacher training provision); or blended learning that combines the two.

Pre-training

To get a feel for teaching in Further Education, you can complete a set of six online Pre-ITE (Initial Teacher Education) modules. These free workbooks guide you through a series of scenarios and approaches for teaching students aged 16+.

Enhanced skills

Our programmes are not limited teacher training, we offer a variety of additional support. Through us, you can undertake an Industry Insight placement to enhance your knowledge of specific industries. With a Practitioner Improvement Project Fund of up to £1,000 you can experiment, build and share resources and effective practice - all with the aim of addressing quality improvement in teaching, learning and assessment. All our trainees have professional development that offers wrap-around technical knowledge and skills enhancement. This will keep you up-to-date with the latest technologies used in industry and help you make the best use of remote and online learning to ensure positive outcomes for your students.

Ellie Bennett is an architectural designer. Through the SET for Teaching Success programme she completed a PGCE and is now a Civil Engineering Lecturer at Stephenson College.

"The programme appealed to me because it has been designed specifically to help me teach my subject specialism, and it allowed me to complete a one year intensive course at Level 7. The support enabled me to try new ideas and reflect on what worked for my learners. I'm still working in industry part time so my knowledge is current. My students value my skills because they know that I know what I'm talking about."
