

EXAM QUESTION (1) – TOTAL 5 MARKS

Nick is a farmer.

He has a tank for water.

The tank is in the shape of a cuboid.

The tank is full of water.

Nick knows that $1000 \text{ cm}^3 = 1 \text{ litre}$.

Work out how many litres of water are in the tank.

EXAM QUESTION (2) – TOTAL 4 MARKS

Kiara needs a container to put in her freezer.

She sees this container.

The container is in the shape of a cuboid.

Kiara knows that $1000 \text{ cm}^3 = 1 \text{ litre}$.

She thinks the container holds more than $\frac{3}{4}$ litre.

Is Kiara correct?

You **must** show your working.
