

Exploring Careers Through Technical Routes

Social Care

The

Social care is about providing physical, emotional and social support to help those people in need to develop and maintain their independence, dignity and control.

The adult social care sector offers a range of careers with various job roles, flexible working patterns and different opportunities.

Care workers are the front line staff in all care settings. They can work in a residential care home, as domiciliary care looking after people in their own homes or out in the community.

Their work is outlined by a care plan which has been developed by a social worker/care manager to meet the assessed needs of the person requiring care or support. Duties vary depending on the requirements of their client as well as any associated individual comfort and wellbeing. Their aim is to help people in their care live as independently as possible.

Skills and Requirements

Social care employers are required by law to ensure staff are *'suitability qualified, competent, skilled and experienced'* and that they receive *'appropriate support, training and professional development'* to enable them to carry out their work.

Source: Health and Social Care Act 2008, Regulations 2014.

In order to provide compassionate care and support it is essential to have the correct values and attitudes. In addition you need to have:

- Ability to use core skills accurately (English, number, digital)
- Well developed employability skills e.g. teamwork
- An ability to plan your on-going learning & development and to manage your own health & wellbeing
- The ability to carefully follow specific care/routine requirements (both verbal and written) or procedures without deviation
- An understanding of other people's feelings at all times

The number of adult social care jobs in 2015 was estimated at 1.55 million. An increase of 1% and 12,500 jobs since 2014.

The social care sector will have half a million extra jobs available by 2030
